

**REMARKS**

In the specification, paragraph [0001] is amended to correct the reference to the prior non-provisional application. The reference is changed from "divisional" back to "continuation" as originally filed, to correct an error with the previous Preliminary Amendment filed on July 1, 2004. No new matter is introduced in the application by way of this amendment to the specification.

In the claims, new Claims 28-38 are added to claim subject matter described in the specification as originally filed. Hence, Claims 1-38 are pending in the application. No new matter is introduced in the application by way of these added claims. Claims 3-7, 20 and 24 are amended to more accurately recite embodiments of the invention, rather than for reasons of patentability. No new matter is introduced in the application by way of these amended claims.

Entry of the foregoing amendment, and examination of the application based thereon, is respectfully requested.

The Examiner is respectfully requested to contact the undersigned by telephone if it is believed that such contact would further the examination of the present application.

Please charge any shortages or credit any overages to Deposit Account No. 50-1302.

Respectfully submitted,

HICKMAN PALERMO TRUONG & BECKER LLP
